Exciting news!

I recently had the wonderful opportunity to provide a chapter for the renowned innovator, practitioner, and inventor of Acutron Technology, Dr. Darren Starwynn's new book, **Healing the Root of Pain**.

My chapter on the benefits of adding Aromatherapy to a PNE balancing practice draws upon years of exhaustive research and in-depth analysis of hard evidence based on multiple case studies. It is my hope that it will enhance any energy practice.

While I am extremely excited about this release, there is an important correction that was missed in the editing process by a third party. Please see correction below, and feel free to [contact me](#) if you have any questions or need more information.

IMPORTANT CORRECTION to “Healing the Root of Pain,” by Dr. Darren Starwynn, OMD:

Chapter 7: Aromatherapy and the Brain, by Victoria Bender

If you buy the book, please print this correction and tuck it into or paste it over the text in your book.

Special Introductory

Price: \$49.99

Dr. Starwynn’s new book about his PNE Balancing system for treatment of depression, anxiety, PTSD, chronic pain and other mind-body disorders.

Covers principles and techniques for use of color light, microcurrent, therapeutic sound, **essential oils**, acupuncture, auricular therapy, intuitive counseling and soul healing methods for effectively addressing these issues.

246 pages, includes new color artwork and profuse photos, diagrams and reference charts.

An invaluable reference for all energy healers.

Correction - *The mechanics of vibrational influences appear to exert an extremely fascinating influence in the major centers of emotional reactivity in the brain such as the hippocampus, located only 2 synapses from the amygdala where the sense of smell is initially processed.* Low frequency biphasic microcurrent may be applied directly to both sides of the head, or to the two earlobes, in conjunction with aromatherapeutic cognitive conditioning. This aim is to encourage a more beneficial neuropeptide response in the brain. References that help to support this idea can be found in a number of diverse sources, including Dr. Starwynn’s Microcurrent-Electro-Acupuncture, Doidges’s The Brain that Changes itself, and The Secret Teachings of Plants by Buhner. (See bibliography in Reference section)
